**Construction:** High impact ABS with subcomponents constructed of high-strength nylon.

**Lasers:**

- 4 lasers total
- 2 IR targeting lasers and 2 RED aiming lasers
- IR lasers are Class1A 780nm with the option to use 850nm or 980nm
- RED aiming lasers are 650nm and are currently Class 3R. These can be replaced with Class 1 lasers. Lasers are programable for any pulse length for different simulator applications.

**Batteries:** 2 AA batteries. Expected battery life is approximately 22 weeks of normal use.

**Electronics:** 1 main circuit board with an ATMEL 328P processor with 2 daughter circuit boards controlling ARC functions.

Future growth capacity will allow for the cartridge to change out.
